<sup>1</sup> Surveys completed in October and results based on repetitive 3-pass removal method using an electrofisher.

<sup>2</sup> RM; indicates miles from rivermouth

<sup>3</sup> Data listed as single digit 0; indicates stream was dry at sampling station

<sup>4</sup> Average 1993-on comparison does not include data for lowest river sites at Meadows Road (1995); Schulte Area (1996), and Red Rock Area (1997- present).

<sup>5</sup> Result for Lower River Site, 2004, (upper Red Rock) is estimated from one pass of rescues and data from Red Rock and Scarlett pop. surveys the past seven years.
